Powerful solutions  
for modern businesses

**VALAD**  
INFOTECH

# Vision

Be the Global Leader in Marine & Shipping Outsourcing Services.

# Mission

Provide effective solutions via partnerships with our clientele. It is our endeavor to be partners to our clientele and not be vendors.

# Our Skilled Experts Will Help You Get Ahead

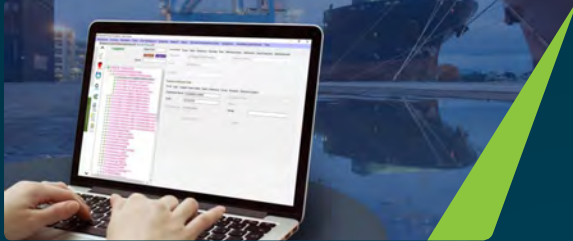

A unique mix of experienced marine professionals - equipped with IT skills, state of the art technology and years of sailing experience has made Valad Infotech Solutions one stop solution provider for all IT & ITES related services.

Our engineers automate processes and provide IT solutions for a host of requirements for the marine industry. These include :-

- PMS & Project Management
- On-board & Warehouse Inventory Management and bar coding
- Business Process as a Service (BPaaS)
- Customized Software Solutions
- Digitization
- Marine IT Projects
- e-learning & CBT (Computer Based Training)
- Marine Consultancy
- Big Data Analytics

# Our Core Services

## PMS & Project Management

Technical ship management system for both planned and unplanned maintenance, defect reporting and technical asset and data management.

- \* Helping clients and companies reduce their purchasing & Inventory cost of spares and thus reducing operational downtime on board vessels.
- \* Complete on board Inventory management including identifying spares/locations, effective labeling & tagging of location/spares and entering all data in PMS/ excel sheets.
- \* Option of selecting between one-time inventory (vessel visit) or Long-term inventory management for 2, 3 or 5 years as required.
- \* Standardization of spares location across the fleet.

## Digitization

Convert all manuals into digital format with super-fast search capabilities using our digitization process.

- \* Complete PMS Project management and Implementation, from selecting a PMS, data population in PMS to training the crew & Implementation of software.
- \* PMS support includes, but not limited to Data Migration, Data Cleaning & Standardization, Data Centralization, Data Validation etc.
- \* Experience of building more than 1400 databases of different types of vessels including Cruises, Oil & Gas carriers(LNG+LPG), Containers, Bulk carriers, Offshore vessels etc.
- \* Experience of working on major (top 25) PMS softwares, such as Shipnet, AMOS, NS5, Bassnet, Ship manager etc.

## Onboard Inventory & Barcoding

Spares management made efficient using our customized inventory management & bar coding technology.

- \* End-to-End support including picking up documents from client's office/location to returning back.
- \* Conversion of hard copies to softcopies.
- \* All pages of each manual go through OCR (Optical Character Recognition) to make words searchable.
- \* Indexing & bookmarking covering sections, sub sections and all main chapters of the document, as per agreed nomenclature.
- \* Navigating tool for managing digitized documents.

# Our Core Services

Skilled professionals with required experience at a fixed monthly price.

Option of scaling the team size up or down at a short notice
